

Container with Ferrule Slanted Base

675 A61650	591 mm	394 mm
675 A616100	787 mm	470 mm
675 A616200	995 mm	570 mm
675 A13601A	Hygienic valve kit with EPDM seals	
675 A13601S	Hygienic valve kit with silicone seals	
675 A13610B	90 degree bend. 316L stainless steel 0mm	

These containers are ideal for use with liquids. The hygienic stainless steel drum is fitted with a 1.5" ferrule (BS4825-3). Containers with Ferrules are the perfect vessel for use in laboratories, production and general work.

The valve (tap) can be clamped on to the ferrule and then be used to empty the container in a controlled manner.

QAQC LAB 316L Stainless Steel Drums with a slanted base, allow the drums to drain completely. The drums are finished to a mirror polish for easy cleaning.

As standard the stainless steel drums come with lid, clamp and silicone seal. Other seals including Viton and EPDM are available on request.
