

Sleeve Sampler

Large Volume Sampling From Depth

QAQC LAB
www.qclabequipment.com

Ideal for sampling large volumes at great depths. Various sized chambers can be attached to the same handle to allow different sample volumes to be taken.

- Single Point
- 316 stainless steel, bright finish
- Adjustable Length - use extension rods to make the sampler the required length

The heavy duty handle and extension rods have been designed to be extremely strong and robust to allow samples to be taken from depths up to 6m (after about 6m the sampler gets heavy).

Operation

1. Screw the Sample Chamber onto the handle and insert the sampler into the product.
2. At the required depth pull up the sampler slightly. This will force the sleeve down so that product can fall into the Sample Chamber.
3. Remove sampler.
4. To empty sampler either pour sample out of filling port or unscrew the tip.
